23 MAR 1970

Deputy Director for Coordination  
INR/DDC/State  
6635 New State  
Washington, D. C.

Because of the discussions we had when you visited the Center in February, I thought you would be interested in the attached report. It is one example of the kind of informational input we can make on activities in areas other than our prime target areas.

I know you understand that our first priority of effort is against the so-called denied areas. But, we like to encourage analysts concerned with other areas of the world to make relevant use of the asset. Also, we expect that new and improved systems over the coming years will enhance our capability to assist such analysts.

Sincerely,

Arthur C. Lundahl  
Director  
National Photographic Interpretation Center
